

# Containers can't fly!

Nor can the around 1 billion tonnes of iron ore, coal, oil, gas and other goods we ship each year.

But we've all but lost a stake in this vital industry.

Foreign ships carry 99 per cent of our international trade and 30 per cent of our domestic coastal trade.

We need more **AUSTRALIAN** ships, not ships of shame that threaten human rights, safety standards and the environment.

The Labor Government has committed to refloating Australian shipping. But we need the reform package urgently.

Help keep Australia afloat.
