

Computer Vision Safety System

 Cameras Are in Use for Safety

Why?

- To detect hazards in real time
- To alert workers & supervisors
- To help keep everyone safe at work

What the system does

- Watches for PPE, equipment, and restricted zone risks
- Sends safety alerts to prevent incidents
- Stores video only if an incident needs review or by law

What it does NOT do

- No audio recording
- Not for watching or rating your performance
- Not hidden — cameras are openly installed

Your Privacy

- Information is protected under Australian privacy laws
- Only authorised people can view any stored footage
- Data is deleted when no longer needed

Questions?
