

NSCOP: Endorse the MUA Submission to Safe Work Australia

Action petitioned for	We, the undersigned, endorse the MUA's submission on the first-ever National Stevedoring Code of Practice and call
	for its approval. The code, reflecting principles advanced by the Maritime Union of Australia, is rooted in a very simple,
	humane idea: every person who goes to work should come home alive and unhurt. Our voices-fathers, mums, sisters,
	brothers—are a chorus of the vast majority of Australians who are pitted against a small collection of stevedoring
	companies and their corporate allies. For maritime workers, the code is a fight for survival. But, we are also workers in
	every industry because the code represents basic Australian values: life before profit, societal well-being before
	individual gain.
